Dr. Barbara Soniat is an Associate Professor at the National Catholic School of Social Service. Monica Micklos was the founding director of ESM-Cares (now called Seabury Care Management). They have a combined 50 years of experience in the field of geriatric social work. They are co-authors of the capacity-risk model, a conceptual framework to guide decisions about interventions with vulnerable older adults.

Social workers are frequently the first responders in situations that require assessment of at-risk older adults. In this workshop you will learn about theories and strategies that guide effective practice with vulnerable older adults in a variety of settings. The workshop will include discussion of values and ethical dilemmas, success factors in relationship building and use of a capacity-risk model to guide assessments and decision making.
